

Information Provision Policy on Product Data for RICOH GR IV (model: R09010)

The information provision policy in accordance with Regulation (EU) 2023/2854 (Data Act) regarding RICOH GR IV (model: R09010) (hereinafter referred to as “the Product”) is as follows.

1. Scope of Covered Data

- The types, formats, and estimated volume of data generated and processed by the Product are as follows.

Data type	Data format	Estimated data volume
Camera log	CSV	Minimum approx. 16KB (30KB per year)
Exif	Binary file	Approx. 3KB

2. Generation of Covered Data

- The Product generates product data when images are captured.

Camera log: Generated when images are captured and stored in the internal flash memory when the power is turned on.

Exif: Generated when images are captured and stored as metadata in the image file.

3. Storage of Covered Data

- The product data is stored in the internal memory, on the microSD card installed in the Product, as well as related services.

4. User Access to Covered Data and Related Actions

- Users may access, search, and, if necessary, erase the data of the Product as follows.
- Camera log can be checked using dedicated application GR WORLD. Camera log can be erased from “Reset to Factory Default” in the Product. “Reset to Factory Default” resets all the camera functions and deleted all the images saved in the internal memory.
- Exif data can be obtained and edited using general Exif editing software.

5. Contact Information

- For inquiries regarding the Data Act, contact RICOH IMAGING EUROPE S.A.S at the following.
